## EXAM, Media Studies 2020

To be handed in by 2 pm (14:00), Friday, 29<sup>th</sup> of May 2020

Foto: CDC, Alissa Eckert

The first case of someone suffering from coronavirus disease (COVID-19) can be traced back to 17<sup>th</sup> of November 2019 in Wuhan, Hubei province, China. From China the highly contagious virus quickly spread across the globe. On the 11<sup>th</sup> of March 2020 the World Health Organization (WHO) characterised COVID-19 as a pandemic.

As of 16<sup>th</sup> of April 2020, approximately 2,171,424 cases of COVID-19 have been reported, resulting in approximately 144,850 deaths. Authorities worldwide have responded to the pandemic with quarantines, lockdowns, travel restrictions and border closures.

Write a thesis where you analyse the media coverage of COVID-19 as a **media event**. Compare and contrast the **media framing** of the corona virus disease in various countries and media outlets. You should use:

- Al Jazeera English - <https://www.aljazeera.com/>
- British media
- Media of your home country

Give examples of how the different media outlets choose to cover the corona virus disease. You should use at least five examples in total, referring to how the different media framed their coverage and make use of quotes to illustrate the type of coverage. You are expected to refer to relevant theories from your reading list and other scientific sources – using APA 6<sup>th</sup> referencing style.

The thesis should be 12-15 000 characters in length, and must be written in English. When using non-English quotes as examples from the media of your home country, please translate them to English.

Hand in the exam via **Inspira** no later than 2 pm (14:00), 29<sup>th</sup> of May 2020.

GOOD LUCK 😊

\*\*\*

## Grade guidelines

- **A (outstanding)**

- Outstanding media analysis of the coronavirus disease (COVID-19). The candidate shows very good judgment and a high degree of independence. Very good use of the curriculum and other literature. The candidate discusses and judges the term **media event** with references to Katz and Dayan, and defines the term **media framing** with references to Schudson (or other literature). Very good discussion and a clear link between theory and empirical evidence. Precise and clear language. Clear, independent and interesting arguments. Correct and consistent use of references. Stays within the defined limits unless there are very special reasons not to.

- **B (very good)**

- Very good media analysis of the coronavirus disease (COVID-19). The candidate shows very good judgment and independence. Good use of curriculum and other literature. The candidate discusses the term **media event** with references to Katz and Dayan, and defines the term **media framing** with references to Schudson (or other literature). Good discussion and link between theory and empirical data. Precise and clear language. Correct and consistent use of references. Stays within the defined limits.

- **C (good)**

- Good analysis of the coronavirus disease (COVID-19). The candidate shows good judgment and independence in the most important areas. Some use of the curriculum and other literature. The candidate presents the term **media event** with references to Katz and Dayan, and defines the term **media framing** with references to Schudson (or other literature). Some discussion and some link between theory and empirical evidence. Somewhat unclear and imprecise language. Somewhat incorrect or inconsistent use of references. Exceeding of the specified limits without any special reason.

- **D (fairly good)**

- Fairly good analysis of the coronavirus disease (COVID-19), but with some significant shortcomings. The candidate shows some degree of judgement, but lack independence. Little use of curriculum and other literature. The candidate does not present the terms **media event** and **media framing**, or lacks references to Katz and Dayan, Schudson and other literature. Lack of discussion and little link between theory and empirical evidence. Unclear and imprecise language. Incorrect or inconsistent use of references.

- **E (sufficient)**

- Sufficient analysis of the coronavirus disease (COVID-19). Performance and media analysis satisfy the minimum requirements, but no more. The candidate shows little judgment and no independence. Very little use of the curriculum and other literature. The candidate does not present the terms **media event** and **media**

**framing.** No discussion and no link between theory and empirical evidence.  
Unclear and imprecise language. Incorrect or inconsistent use of references.

- **F (fail)**

- Performance and media analysis do not satisfy the minimum requirements. The candidate shows no judgment and no independence. No use of curriculum and other literature. No discussion and no link between theory and empirical evidence. Unclear and imprecise language. No references.
